Need fast ROI? Our skilled clinical team stands to make a positive difference in your organization. Advent's staff experience with both payers and providers means that our staff can get to work immediately, reviewing pre-bill claims to identify corrections prior to billing or recognizing post-bill appeal opportunities. Advent then works closely with your personnel to share identified operational, contractual and organizational root-cause and process improvements. This feedback loop maximizes efficiency and increases reimbursements. Result? **A 90% success rate in overturning denials.**

CAVO Technology

Are your claims worthy of clinical review? CAVO™ Technology is a SaaS-based application developed by Advent as an internal solution to leverage efficiency gains in denial review. It aids the decision-making process by gathering relevant data around a claim to correct inefficiencies before billing or preparing for an appeal post-billing. CAVO™ allows the user to find pertinent documents from multiple systems in near real-time. Clinicians, coders, and analysts alike benefit from the timeliness and accuracy of the search and assembly feature. Our clients routinely experience up to a **5x productivity lift** when CAVO™ is implemented.
