

## APPEAL MANAGEMENT

# DRG and Clinical Validation

Inpatient Denial Management | Claim Review Technology | Clinical Expertise | Flexible Partnership

## A technology-enabled DRG and clinical validation review solution for hospitals & health systems

Advent Health Partners' specialized clinical and coding resources use Apello, our AI-driven technology, to quickly and efficiently intake and extract critical attributes from your medical records and other unstructured data sets required for an accurate and defensible reimbursement at the click of a button. Our clinician-led technology incorporates clinical expertise into every line of code to bring healthcare-focused organization and efficiency to your workflow.

### The DRG & Clinical Validation and Appeal Process with Advent

**Step 1:** Advent intakes the medical record into our Apello application to ensure original documentation supports the DRG and appropriate diagnosis sequencing.

**Step 2:** Advent's qualified coders and clinicians evaluate indexed documentation gathered within Apello to validate the appropriateness of the original DRG billed.

**Step 3:** Advent's clinical experts seamlessly determine the strength of the response and create and submit an appeal packet pinpointing decision-making data affirming a compelling argument.

**All in one interface.**

### Why Use Advent for DRG and Clinical Validation?

**90+% Overturn Success Rate**

Advent has a 90+% overturn success rate with our current clients, which aids in decreasing the cost-to-collect.

**We Conduct Timely Audits**

Reduce audit time and increase audit accuracy with Advent's clinical experts, who have 20+ years of experience in different healthcare designations.

**Obtain Comprehensive Defense**

In the unlikely event of a denial, Advent defends our work throughout the life of the claim—at no additional cost.
