

ADVENT HEALTH PARTNERS

# Utilization Management

Denial Prevention | Prior Authorizations | Concurrent Reviews  
Pre-Bill Reviews | Clinical Expertise | Flexible Partnership

## Increase your clean claim submission rate while ensuring high-quality patient care.

Advent Health Partners works as part of your team to complete more utilization management reviews, reinforcing your organization's denial prevention strategy and letting your clinical team do what they do best: patient care. Our data-driven approach can reduce your organization's rising costs with detailed claim review — we are able to identify mistakes in missing medical necessity documentation or errors in coding and billing.

### How Advent Can Help

#### Prior Authorization

Leverage Advent's documentation reviewal and prior authorization services to confirm medical treatment meets industry criteria and receive detailed authorization status insights.

#### Concurrent Reviews

Eliminate concurrent review coverage gaps with our first-level utilization reviews performed to accommodate specific times, days, or review types in real-time for emergency department or inpatient cases.

#### Pre-Bill Reviews

Ensure clean claim submissions by utilizing Advent to identify and provide written recommendations on denial-causing clinical documentation and coding errors before the bill is dropped.

Being able to prevent some of these problems before we ever dropped the bill was really powerful. We were even closer to getting our DNFB to three days or fewer, reducing our rate of denials, and winning by getting the claim paid correctly the first time.”

— Operations Executive, Large Hospital
